How to Manage Pick List Values

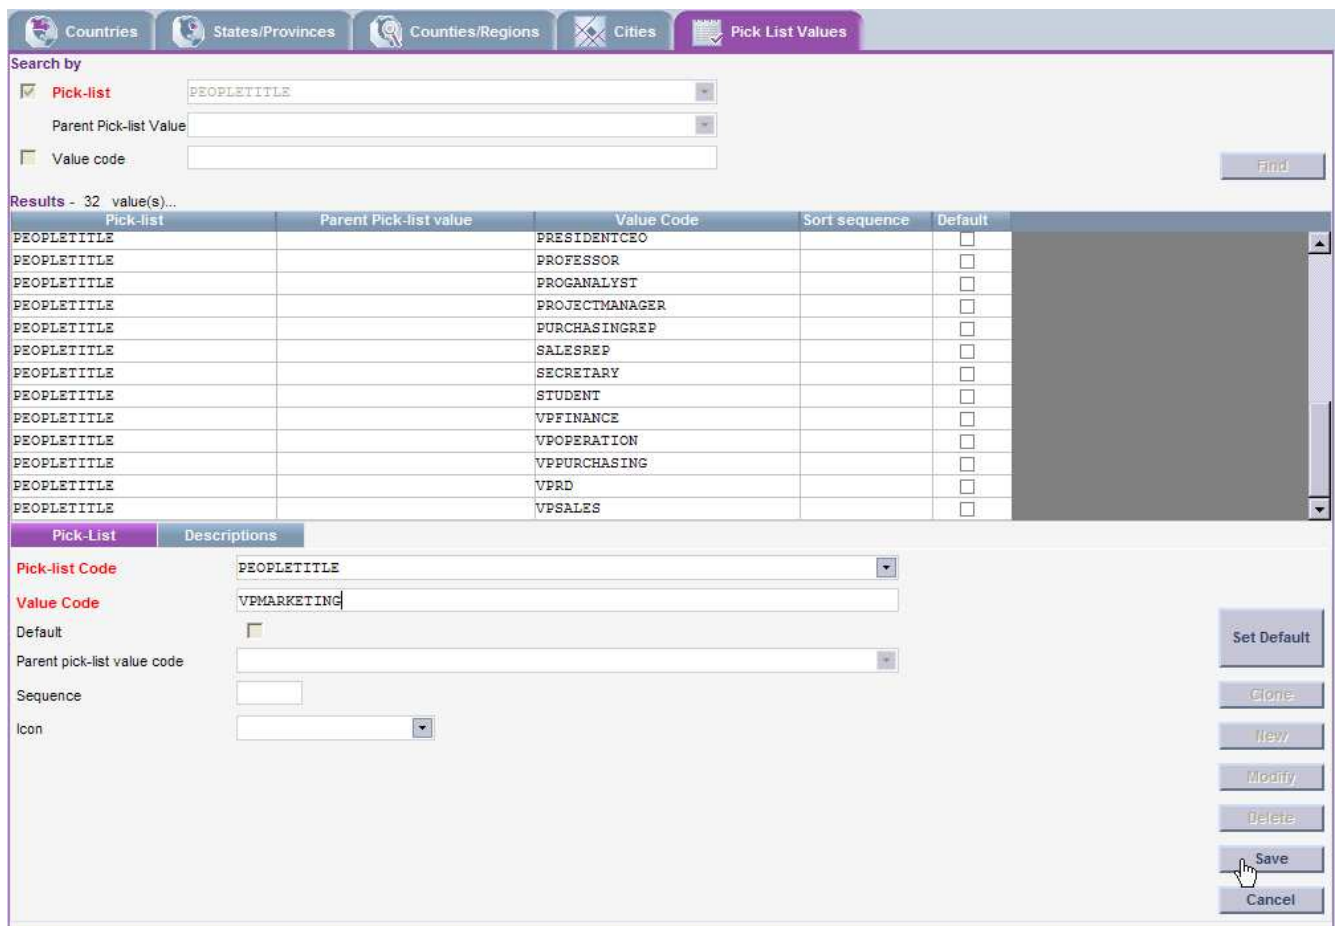

Go to Pick List Values application

Description

Select Data process and then Pick List Values application.

Create Pick List Value

The screenshot shows the 'Create Pick List Value' application interface. It features a search bar with the following fields:

- Search by:**
 - Pick-list** (dropdown menu showing 'PEOPLETITLE')
 - Parent Pick-list Value (dropdown menu)
 - Value code (text input)
- Find** button

Below the search bar, it displays 'Results - 32 value(s)...' and a table with the following columns: Pick-list, Parent Pick-list value, Value Code, Sort sequence, and Default.

Pick-list	Parent Pick-list value	Value Code	Sort sequence	Default
PEOPLETITLE		PRESIDENTCEO		<input type="checkbox"/>
PEOPLETITLE		PROFESSOR		<input type="checkbox"/>
PEOPLETITLE		PROGANALYST		<input type="checkbox"/>
PEOPLETITLE		PROJECTMANAGER		<input type="checkbox"/>
PEOPLETITLE		PURCHASINGREP		<input type="checkbox"/>
PEOPLETITLE		SALESREP		<input type="checkbox"/>
PEOPLETITLE		SECRETARY		<input type="checkbox"/>
PEOPLETITLE		STUDENT		<input type="checkbox"/>
PEOPLETITLE		VPPINANCE		<input type="checkbox"/>
PEOPLETITLE		VPPERATION		<input type="checkbox"/>
PEOPLETITLE		VPPURCHASING		<input type="checkbox"/>
PEOPLETITLE		VPRD		<input type="checkbox"/>
PEOPLETITLE		VPSALES		<input type="checkbox"/>

Below the table, there are two tabs: 'Pick-List' and 'Descriptions'. The 'Pick-List' tab is active, showing the following fields:

- Pick-list Code:** PEOPLETITLE (dropdown menu)
- Value Code:** VPMARKETING (text input)
- Default:**
- Parent pick-list value code:** (dropdown menu)
- Sequence:** (text input)
- Icon:** (dropdown menu)

On the right side of the form, there are several buttons: Set Default, Clone, New, Modify, Delete, Save, and Cancel. A mouse cursor is pointing at the 'Save' button.

Description

Most pick list values in MyriadApp can be managed using Pick List Values application.

For example, use the **New** button to define and add a new Pick List Value.

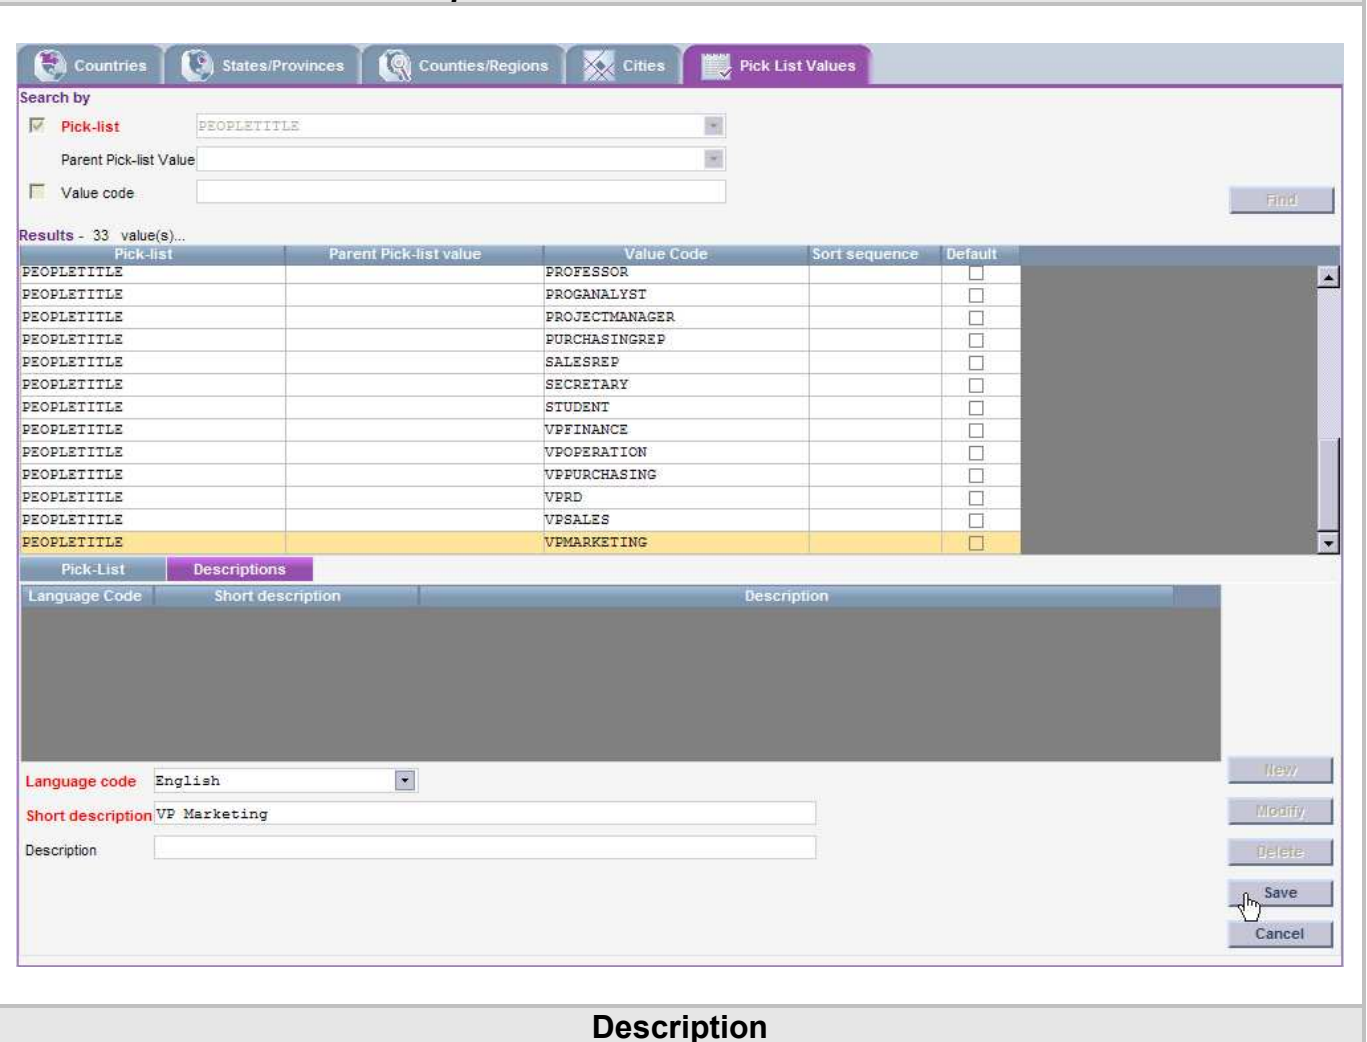

Value Code is mandatory. The Value Code is simply a code used to manage pick list values and the actual description displayed in the application needs to be configured under Descriptions tab.

Use the **Save** button when information has been entered.

Note:

- You will need to click the web browser **Refresh** button to see your changes in application pick lists

Create Pick List Value Descriptions

Results - 33 value(s)...

Pick-list	Parent Pick-list value	Value Code	Sort sequence	Default
